HEAT MANAGEMENT FOR
MISSION-CRITICAL APPLICATIONS

TESTED. TRUSTED.

At IEA, we have the experience and expertise to understand your unique heat removal needs. We don't ask you to choose from a set product line, we partner with you to build what you need—whether it's big, small or in between. Our radiators are meticulously engineered and tested with our in-house calorimeter to ensure that they perform exactly to spec. And if you find that it's not operating as designed after installation, we'll make it right—guaranteed. With expert techs on hand 24-hours a day, you can count on our team to keep your system running efficiently year in and year out.

INDUSTRIES

POWER GENERATION APPLICATIONS

- Oil and Gas
- Standby/Backup Power
- Emergency Power
- Prime Power
- Peak Shaving Power
- Mission-Critical Systems

MOBILE EQUIPMENT APPLICATIONS

- Construction
- Agriculture
- Mining
- Rail
- Forestry
- Utility and Municipal Vehicles
- Forklifts and Material Handling
- Cranes
- Drilling

INDUSTRIAL EQUIPMENT APPLICATIONS

- Process Industries
- Fluid Power
- Paper Mills
- Steel Mills
- Power Units
- Presses

PRODUCTS

RADIATOR PACKAGES

- Engine Mounted Radiators
- Remote Radiators
- Diesel Engine Radiators
- Custom Designed Radiators

HEAT EXCHANGERS

- Combo Coolers
- Horizontal Industrial Heat Exchangers
- Plate Frame Heat Exchangers
- Brazed Plate Heat Exchangers
- Standard Coolers
 - Fuel, Hydraulic, Transmission, Lube, Gearbox

INDUSTRIAL COOLERS

- Fluid Coolers
- Chillers

RADIATOR PACKAGES

Performance When it Matters Most

Reliable heat management is vital to keeping your mission-critical equipment running when it truly counts. Our radiator packages are engineered to perform exactly to spec, so you can trust that it won't fall short when up against a challenge.

ON-TIME DELIVERY

Manufacturing many of our parts in house gives us greater control over our production timeline, preventing surprises and delays in your project.

VERSATILE MATERIALS

With aluminum and copper-brass options available, we can deliver efficient performance in lighter-weight or traditional formats.

RUGGED CONSTRUCTION

IEA radiator packages are designed and built to withstand tough conditions and high vibrations, so they require less maintenance over a unit's lifetime.

FLEXIBLE CUSTOMIZATION

Just tell us what you need and we'll build a radiator that fits your performance specs, your weight limit and your budget.

CHOOSE FROM A FULL SELECTION OF CORE AND FIN TYPES:

- Aluminum Bar Plate
- Tube Fin
- Round Tube
- Plate Fin
- Serpentine (Index) Fin
- Mechanically Expanded
- Parallel Flow
- Drawn Cup
