Mike,

Do you think we can meet halfway at \$16,500?

Each unit has a breaker , ct's and regulator. No control panel. The breakers alone are worth the value.  
No Megger test reports and cannot provide one.  
The units were removed at the beginning of this year because our customer went to a 4 gen system and paralleling .

We are getting these out of storage and should have pictures soon.

Mike,

Let me see what I can do.

Honestly we only need one but at the right price we would buy the 2nd for stock.

Is the breaker and control panel on the 2nd unit also included?

Do you have a Megger test report on them? If not can you provide one?

When were the generators removed from the engines and why?

Hi Mike,

Thanks for the photos.

We committed to purchase the 1st one for \$10k would you do the pair for \$15k?

We can pay by wire and you would not have any eBay fees.

Regards,

Victor Seropian

Here is some additional pictures of the units before we took them off the engines. We have two of these. ebay would not let me post 2 units at a time. If you are interested in the second one, let me know.
