MTU Onsite Energy

MTU Onsite Energy is a leading provider of decentralized energy systems, based on diesel and gas engine technology. MTU Onsite Energy offers diesel engine systems, gas engine systems and gas turbine systems. MTU On-Site Energy provides equipment for standby power, security power, short-break gensets and no-break gensets. All systems are designed to restore electric power to the consumer either immediately or after a defined delay following an outage in the main supply.
